Professional Summary

Aspiring Data Analyst with a background in Data Science and hands on experience in data analysis, machine learning, and business intelligence. Skilled in Python, SQL, Power BI, and data visualization, with internship experience and projects focused on solving real world business problems. Passionate about transforming complex data into actionable insights to support decision making.

Education

UPES Dehradun, India	August 2022- June 2026
Bachelors of Technology in CSE – Data Science	CGPA: 8.10/10.0

Internships

Data Science Intern	June 2025 - July 2025
DRDO-ISSA Lab, Defense Research and Development Organization	Delhi, India (on-site)

- Project: Bodhak AI**-Worked on a system that converts natural language queries into SQL commands for easy database interaction.
- **LangChain Integration:** Utilized LangChain to build the text-to-SQL pipeline, connecting large language models with structured data sources.
 - **Database Connectivity:** Connected Python applications to local databases to execute SQL queries and validate model accuracy.

Data Science Intern	June 2025 – July 2025
IBM, International Business Machines	(Remote)

- Project: Titanic Survival Prediction** - Built a machine learning model to predict passenger survival using Python and scikit-learn.
- **Data Preprocessing:** Cleaned, transformed, and analyzed the Titanic dataset to identify key survival factors.
 - **Model Development:** Implemented and compared multiple classification algorithms (Logistic Regression, Random Forest, Decision Tree) to improve prediction accuracy.
 - **Visualization & Reporting:** Used Matplotlib and Seaborn for exploratory data analysis and presented insights through visual reports

Marketing Analyst Intern	April 2024 - Sept 2024
IPM Management Services	Dehradun, India (Hybrid)

- **Marketing Analytics:** Utilized Excel and Power BI to evaluate marketing campaign performance and recommend improvements.
- **Insight Generation:** Delivered detailed reports and insights for informed decision-making and campaign targeting.

Key Projects

Blinkit Sales and Operations Analysis using Power BI

- Tools Used:** Power BI, DAX, SQL, Excel
- Processed and analyzed business data using SQL and Excel to identify key trends and performance indicators.
 - Created KPIs and visual reports using DAX to track revenue trends, order distribution, and product performance.

Aspiria – Business Consulting Project (2022-2025)

Helped 10+ small businesses improve their social media presence, technical setup, and digital operations, providing consulting support on branding, online visibility, and basic technology adoption, contributing to improved customer engagement and business growth.

Text-to-SQL Intelligent Query System

- Technologies Used:** Python, LangChain, SQL, NLP
- Developed an AI-powered text-to-SQL system that translates natural language queries into SQL statements and retrieves data from databases for easier interaction.

Skills

- Programming & Querying:** Python, SQL
- Data Analysis & Machine Learning:** AI, NLP, Automation, Prompt Engineering
- Visualization:** Power BI, Tableau, Excel (Advanced), Power Point
- Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, LangChain, PyTorch, Hugging Face,
- Consulting Skills:** Requirement Gathering, Solution Design, Product Demonstration, Stakeholder Communication
- Soft Skills:** Leadership, Communication, Teamwork, Negotiation

Certifications

• Databases and SQL for Data Science with Python, Coursera	Link
• Microsoft DP-100 Data Science Solution	Link
• Microsoft Excel, Infosys	Link
• Marketing Analytics, Infosys	Link
• Overview of Business Analytics, Infosys	Link
